ourstory

Over 20 years ago, a simple bonfire beneath the iconic Ayers Rock in Australia ignited a vision. Inspired by the captivating flames and ancient Aboriginal tales, Alfred Weilandt and Jerry Dąbrowski set out to create a way to bring fire into contemporary interiors—without the soot, ash, or need for a chimney. This idea led to the development of automatic bioethanol fireplaces, combining advanced technology, safety, and the timeless appeal of natural flames. Powered by our patented BEV® Technology, these fireplaces burn cleanly and efficiently, offering a modern, environmentally friendly solution for creating a warm, inviting atmosphere.

As our expertise grew, so did our portfolio. To complement our bioethanol fireplaces, we introduced additional technologies: gas fireplaces for easy installation and reliable performance, water vapor fireplaces for a lifelike, emission-free flame effect using only water and light, and electric fireplaces with customizable LED flames. While bioethanol remains the heart of what we do, these innovations allow us to meet diverse needs and enhance the possibilities of fire design in any space.

At the core of Planika's success is a dedication to quality, sustainability, and family values. A few years ago, Jarosław Dąbrowski's daughter, Patrycja Gierak, joined our team, bringing fresh energy to the legacy of craftsmanship and trust. Our team operates without hierarchy, ensuring creativity and passion guide every product we create.

With a presence in over 100 countries and a focus on ecological responsibility, Planika continues to lead the way in advanced fire technologies—delivering solutions that combine innovation, design, and respect for the environment.

~This made it possible to give you truly unique solutions in fire design.

Planika

CUSTOM FIREPLACES

SKY IS THE LIMIT

Choose from our range of chimney-free fireplaces and tailor the solution to fit your project. Customize the color, finish, shape, length, and flame type. It's your project, your rules—we provide the solutions.

COLOR AND FINISH OF A BURNER

Choose any RAL color and one of three finishes - Matte, Silk or Gloss.

MATTE

SILK

GLOSSY

TECHNOLOGY

Choose the perfect technology for your project. BEV bio fireplaces offer a clean, eco-friendly flame, water vapor fireplaces create a realistic fire effect without heat, and LED technology gives full control over the fire's appearance.

CUSTOM FIREPLACES

SHAPE OF A BURNER

Personalize the shape to harmonize with the interior. Every detail is in your hands, allowing everything to align with your aesthetics and project needs.

DIMENSIONS OF A BURNER

Tailor the length of the burner to perfectly fit your space. Whether you need a compact or extended size, we offer flexibility in dimensions to match the scale of your project.

PROJECT DEPARTMENT

Our Project Department offers free project reviews to ensure safe distances and finishes. As part of your project, we can meet nearly any need and bring almost any idea to life.

AUTOMATIC BEV[®] FIREPLACES

INDOOR COLLECTION

BEV[®] TECHNOLOGY

GAME-CHANGING INNOVATION IN FIREPLACE INDUSTRY

The BEV[®] technology is the most advanced technology on the fireplace market and it has revolutionized the industry. It is now possible to have a line of fire in a media wall under TV, in an apartment on a higher floor, arranged as a room divider or even on a yacht. For years now, this innovative solution has been taking projects with real fire to the next level. You can use fireplaces with the BEV[®] technology anywhere you want, without any limitations. It is manufactured according to UL standards and is O-TL certified, meeting the most demanding safety and quality requirements.

PLANIKA AUTOMATIC FIRE

HOW DOES THE BEV[®] TECHNOLOGY WORK?

The entire burning process is fully automated. The fireplace takes only the required amount of fuel from the tank and the pump transports it to the combustion chamber. The bioethanol is vaporised and distributed along the entire length of the burner where it is then combusted. The fire does not come in any direct contact with the liquid fuel. Thanks to the isolated fuel tank, the cooling fans and the combustion chamber, the temperature of the ethanol fuel is always low and safe.

The microprocessor communicates with many sensors inside the fireplace and controls its entire operation. The fireplace informs you of any actions with a sound signal and a message in the mobile app. The convenient remote control of the fireplace eliminates any risk of human error.

Net Zero[®]

CARBON NEUTRAL SOLUTION FOR PREMIUM DESIGN

Planika's mission is to create safe fireplaces that leave little to no impact on the environment. Our automatic fireplaces with the BEV[®] technology are fuelled with bioethanol - organic eco-fuel. This allows to use our products where traditional fireplaces are prohibited by the environmental restrictions. Planika has developed the cutting-edge solution - the true CO₂ - neutral fireplaces of the future.

WHAT IS FANOLA FUEL?

- ✓ 96% ethanol concentration
- ✓ odourless and clean combustion
- ✓ plant-origin distillate
- ✓ particulate-free
- ✓ multi-distilled
- ✓ pharmaceutical quality
- ✓ natural, golden flame

HOW ARE PLANIKA'S BEV[®] FIREPLACES CO₂ NEUTRAL?

Planika's fireplaces utilize multi-rectified bioethanol which is made from plants, such as wheat, corn or potatoes. The BEV[®] Technology turns liquid fuel into ethanol vapors to provide the safest combustion process and the most natural fire. The clean burning of ethanol vapors emits only a small amount of CO₂ – similar to that exhaled by a human. No ash, soot, or smoke are produced. 100% of the emissions are absorbed by the same plants that are used to produce the biofuel. This way the carbon emission process comes full circle.

INDOOR ETHANOL FIRES

AUTOMATIC ETHANOL BURNER (Net Zero® fireplace with BEV® Technology)

FIRE LINE AUTOMATIC 4 (FLA4 BURNER)

FEATURES

- Automatic refilling system
- Remote control
- Touch control panel
- Wi-Fi and mobile app
- 6 levels of flame
- Safety sensors
- Variant with larger fuel tank (FLA4+)
- Smart Home System compatible
- CO₂ sensor
- Top finish:
 - Black powder coating (standard)
 - Stainless steel (optional)
 - RAL color (optional)

OPTIONAL ACCESSORIES

- Glass screens
- Decorative tray with logs or stones
- Smart Home System module
- Adaptive frame with glass screens for Freestanding, Tunnel, Room Divider and Island arrangements

WATER VAPOR FIREPLACES

INDOOR COLLECTION

LUMISTY[®] TECHNOLOGY

DISCOVER WATER VAPOR TECHNOLOGY FOR FIREPLACES

Lumisty™ technology is an advanced system that transforms water into fine steam, creating an exceptionally realistic flame effect when illuminated by LED lighting. Designed to replicate the ambiance of a traditional fireplace without combustion, it offers a safe-to-touch, energy-efficient, and eco-friendly alternative.

HOW DOES IT WORK?

An ultrasonic module generates a dense, controlled mist. This vapor is enhanced by an active LED system featuring RGB diodes that emit precise colors and brightness levels. Spectral lenses disperse the light to mimic the natural movement and depth of real flames, while multi-dimensional steam distribution within the firebox adds remarkable realism.

WHY WATER VAPOR FIREPLACES?

 EASY INSTALLATION WITH NO CHIMNEY	 SAFE TOUCH	 ADJUSTABLE FLAME COLORS (RGB PALETTE)	 CONTROLLED BY MOBILE APP OR A REMOTE
 SOUND OF CRACKLING WOOD	 IMPROVES AIR QUALITY	 CUSTOM LENGTH	 ECO-FRIENDLY
